

# Construction Personnel Required

– overhead transmission line

*Keeping the energy flowing*

**Make history and be part of building one of New Zealand's largest electricity transmission projects since 1960. The North Island Grid Upgrade Project will provide a secure supply of electricity into Auckland and Northland well into the future. Construction personnel are needed to help build the 186km, 400kV capable line which runs from a new substation at Whakamaru (north of Taupo) to a new switching station in South Auckland.**

This is a two year project and we're looking for experienced people for the following:

- **Project Accounts and Contracts Officers**
- **Site Supervision to manage Access Works**
- **Concreting and Foundation Works (including survey set out)**
- **Lattice Tower Assembly and Erection Works**
- **Plant operation**
- **Truck Drivers (preferably with Hiab operating competency)**

If you have these skills and would like to join Transpower and its Alliance construction partner Balfour Beatty United Group Limited, please apply online [www.uglcareers.com/infrastructure](http://www.uglcareers.com/infrastructure)  
Alternatively you can email a CV and covering letter to [nz.careers@unitedgrouppltd.com](mailto:nz.careers@unitedgrouppltd.com) or post to:

**The Recruitment Officer, Balfour Beatty United Group Limited PO Box 12338 Auckland 1642**
